Apply

Yachts typically have access to a range of Internet services. The WANMeister allows the vessel to select which services are used by whom on board. For example, an owner may be allocated unshared use of the VSAT whilst the crew are allocated shared use of the cellular connection.

WANmeister is extremely easy to use; no complicated menus, just a single page. You can control it from a PC, Tablet or mobile phone without installing any software.

The Libra WANmeister solution has well-proven Cisco routing technology at its heart, and combines it with an easy-to-drive user interface.

WANmeister works with VSAT, Cellular (3G/4G), Shore Wifi, Inmarsat, Iridium Pilot and Global Xpress.

Specifications

- Cisco Router (2RU)
- Hardware or Virtual (control appliance 1 RU or Virtual Machine)
- 7 Wide Area Network connections
- DHCP or Static IP on WAN connections
- 25 on-board User Groups
- Individual PC option
- NAT and/or DHCP services
- Coming soon: Bandwidth Control

User Benefits

- Simultaneous use of up to 7 Internet services
- Connect direct groups of users to selected connections
- Flexible use of connections to optimise vessel's situation
- Intuitive GUI
- Switching between networks is instantaneous
- One off purchase
- Future upgrades available
